WHAT MAKES IQTOUCH BETTER THAN THE REST?

iQtouch was designed to be fast, reliable, and fully-featured. In close cooperation with Restaurant Owners just like you, our development team created this POS specifically with Tim Hortons in mind.

Restaurant Owners using iQtouch have commented that Team Member training times have been reduced by half, when compared to previous solutions at their Restaurants.

This translates into measurable cost and service benefits for Restaurants, and happier Guests.

Select any menu item to highlight the ingredients in it. This feature is great for showing the items needed to make any standard sandwich build.

Press to add or remove ingredients to your chosen item with a touch. Fast and easy.

Easily customize the flavors of products available at your location with a 'Preferencing' function that has been expanded throughout the menu.

iQtouch works seamlessly with the way you work.

With more features than we can list, iQtouch provides the latest in automated combo handling as well as detailed transaction histories and menu preferencing.

Backed by our 24/7 bilingual technical support team, we stand by our statement. iQtouch is better than the rest.

Read on, and decide for yourself.

Combos can be entered with a touch, displaying all components instantly.

Intuitive and clearly labeled menu items provide speedy and accurate order entry.

Add or delete multiple trays to group orders with a touch, to easily break out billing.

These and other time saving features eliminate confusion or delays, at the counter and in the kitchen

As the Tim Hortons menu continues to expand, the intuitive iQtouch application will tackle your future needs.

Additional features include:

- A la carte items automatically convert into and present as corresponding combos in the order panel to both guests and Team Members.
- 'Replace' function allows easy modification of any item, displaying all applicable substitutions.
- 'Pickup' function stores orders for tendering later, allowing facilitation of catering orders.
- Simply press 'Repeat Item' to order multiple servings of menu items and combos.
- Made a mistake? Just press 'Cancel Order'.
 - System functions can be scheduled to suit any interval - for example the daily soup rotation automatically takes effect at 12am every day.
